

PRESS RELEASE

Magee Scientific Co./ Aerosol d.o.o. announces Mrs. Mateja Forštnarič as Chief Executive Officer

Ljubljana, April 1, 2021

Aerosol d.o.o. together with Magee Scientific Co., a leading global provider of instruments for monitoring Carbonaceous Aerosols in air, today announced that Mateja Forštnarič had been named as Chief Executive Officer, taking over Dr. Anthony D.A. Hansen's position as Aerosol's Director. Sebastijan Marinič, who has been acting as General Manager, will continue his position. Mateja's main responsibilities will focus on strategies for international and strategic internal growth and development of the business, opportunities for new directions, outreach, and strategic alliances.

About Mateja Forštnarič

Mateja is a seasoned international senior executive, consultant, and leadership advisor with expertise in international business, general management, strategy, marketing, leadership, and organizational development. She has more than 25 years of management and consulting experience. Mateja has held senior executive positions in global consulting companies based at offices in Vienna, Frankfurt, and Amsterdam and serving European, American, and Asian multinational organizations and private enterprises across a broad range of industries, including environmental.

Mateja holds an MBA and an MSc degree from IEDC-Bled School of Management and a BSc of Economics from the University of Ljubljana. She has completed numerous educational programs from several other academic institutions, including Yale University and Vienna University of Economics and Business Administration. Besides her native Slovenian language, Mateja also speaks English, German, Croatian and Serbian.
