

## AE43 PROMOTIONAL OFFER 2021

There's never been a better opportunity to order Magee Scientific Aethalometer® model AE43 and accessories

Dear Black Carbon expert,

You can take Black Carbon measurements everywhere, much easier.

*Get better, more reliable, and comprehensive Black Carbon data at a price that's never been better.*

With AE43, **half the size and weight** of a regular rack mount Aethalometer, you can **easily move around** Black Carbon measurement spots.

Taking advantage of our accessories, like the Aethalometer Power Pack or High Altitude Pump, you're ready to **go places »off-grid«** or move your measurements **high in the mountains.**

Aethalometer Power Pack and Sample pump for high altitude measurements

**More analytical approach towards data processing.**

AE43 has a built-in 10" color touch-screen for control and data display: both in real-time and for visualization of existing data over the specified time. AE43 can display a 'one-dimensional' time-series chart of data; or more advanced 2D plots. For example, a polar diagram indicating the relation between BC concentrations and wind speed/wind.

More data in real time, and on AE43 charts.

*Get better, more reliable, and comprehensive Black Carbon data at a price that's never been better.*

GMX 200 - Wind sensor and exemplary charts on AE43 screen

**Find more about [AE43](#) – New Portable Black Carbon monitor**
